Georgia

Georgia ist eine Back-Antiqua welche 1996 von Matthew Carter für Microsoft entwickelt wurde.

Georgia wurde für die klare Darstellung und optimale Lesbarkeit auf Computerbildschirmen mit niedriger Auflösung entwickelt.

Georgia ist außerdem besonders da sie über einen echten Kursivschnitt verfügt. Stilistisch ist Georgia an Schriftarten, die im englischen Raum als Scotch Roman zusammengefasst werden, angelehnt.

Seit dem Jahre 2006 erfreut sich die Schriftart neuer Beliebtheit da sie in Internetblogs und Zeitschrift ein neues Gebiet für sich entdecken konnte.

Verwendet wird sie unter anderem von *der New York Times*, *Guardian* sowie dem *Wall Street Journal*.

In New Talks, U.S. May Settle for Nuclear Freeze by North Korea

- President Trump met with Kim Jong-un to reopen negotiations with a potential plan that would stop the production of weapons, but dismantle none.
- It would be a significant first step, our correspondents write in an analysis. The Trump administration insists full denuclearization is the goal.
